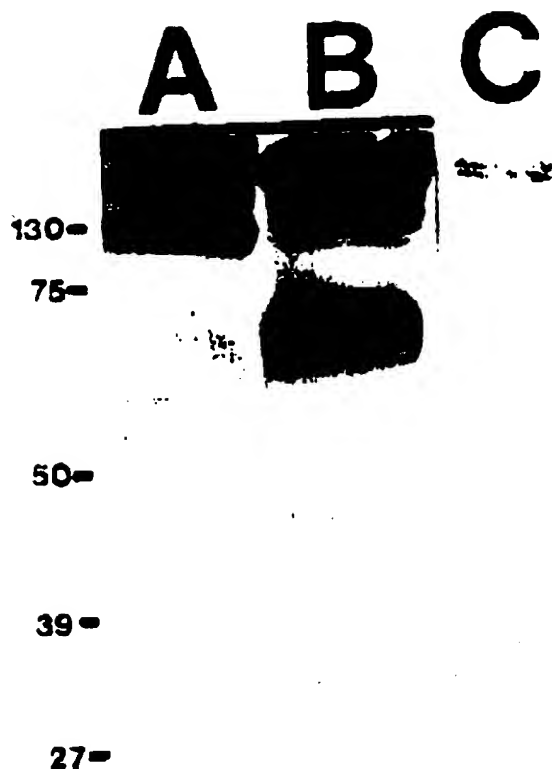

Figure 2 Western Blot analysis of recombinant CD44-Rg-2 protein. Molecular weight standards (Mr X10-3) are on the left. Lane A is control COS cell supernatant immunoblotted with CD44 mab A3D8 (1/100). Lane B is COS cell supernatant from cells transfected with CD44-RG-2 construct and blotted with CD44 mab A3D8. Lane C is CD44-RG-2-containing COS cell supernatant blotted with control IgG! mab P3X63/Ag8.
